

FERNANDO VARELA ROMAN

📍 Mexico ✉ fvr2808@gmail.com ☎ 777 107 7851 in [Fernando Varela Roman](#) 📁 [Portafolio](#)

Profile

Cross-functional Data & ML professional with 4+ years designing, deploying, and validating ML models and production-grade data pipelines across financial and business domains. Strong in Python, SQL, distributed data processing, and the end-to-end ML lifecycle: feature engineering, training, deployment, validation, and monitoring. Hands-on experience across all major cloud platforms (AWS, Azure, and Google Cloud) with containerized, reproducible deployments.

Education

Tecnológico de Monterrey (ITESM) <i>B.Sc. in Data Science and Mathematics</i>	<i>Monterrey, N.L. Jul 2021 – Jul 2025</i>
Tecnológico de Monterrey (ITESM) <i>Diploma in Economy and Finance</i>	<i>Monterrey, N.L. Aug 2024 – Dec 2024</i>
International Program (Anglo American University) <i>International Relations / Argumentation and Debate</i>	<i>Prague, Czech Republic June 2024</i>

Experience

Data Science Coordinator – Risk Intelligence <i>Banregio</i>	<i>Monterrey, NL Aug 2025 – Present</i>
--	---

- Designed, trained, and deployed end-to-end credit-origination scoring models (gradient boosting, GLMs, regularized logistic regression), owning feature engineering, cross-validation, and hyperparameter tuning, with reproducible productionization on cloud compute via containerized Python services.
- Built automated model-validation pipelines that reconcile production scoring outputs against development baselines across multiple model versions, running variable- and row-level comparisons to guarantee parity before every release.
- Developed cohort-based vintage analysis in Python/pandas to track delinquency curves across maturation windows, enabling risk stratification by population segment and early detection of portfolio deterioration.
- Engineered scalable ETL and analytics on AWS (S3, Glue, Athena, Lambda, EC2) with multi-CTE SQL over large credit datasets, orchestrating ingestion, transformation, and reporting through Docker-based, reproducible execution.

Business Development Analyst <i>London Consulting Group</i>	<i>Monterrey, NL Aug 2024 – Dec 2024</i>
---	--

- Built interactive Power BI dashboards with custom DAX measures and tailored data models to surface sales-pipeline and revenue analytics for leadership.
- Automated CRM data workflows in HubSpot (deduplication, enrichment, and scheduled reporting), improving data quality and removing repetitive manual processing.

IT Cybersecurity <i>FEMSA</i>	<i>Monterrey, NL Aug 2023 – Dec 2023</i>
---	--

- Monitored and triaged security alerts across enterprise systems, applying data-driven analysis to detect anomalies and prioritize incident response.
- Documented vulnerabilities and threats and coordinated cross-functionally with technical teams to strengthen the organization's security posture.

Data & Analytics Coordinator <i>Impulsora del Sur</i>	<i>Mexico City, MX Aug 2019 – Jun 2022</i>
---	--

- Developed automated ingestion and preprocessing pipelines in Python and SQL spanning the full ETL lifecycle, replacing manual workflows with scheduled, reproducible jobs.
- Built and deployed ML models for customer segmentation and demand forecasting, applying statistical analysis and A/B testing with confidence-interval quantification to guide campaign decisions.
- Produced analytical visualizations and financial analyses using Python (matplotlib, seaborn) and Excel to support executive decision-making and monthly budget reviews.

Skills

Technical: Statistical Modeling , ML Model Deployment, Risk Stratification, Cohort & Survival Analysis, Machine Learning, Deep Learning , Time Series Forecasting, NLP, Big Data, SQL and NoSQL, Distributed Data Processing.

Soft: Cross-functional Collaboration, Technical Mentorship, Project Management, Stakeholder Communication, Adaptability, Problem Solving, Leadership.

Software: Python (pandas, NumPy, scikit-learn, statsmodels, lifelines, XGBoost, TensorFlow), R, SQL, Power BI, Tableau, Excel, Git, Docker, Kubernetes, AWS , Azure, Google Cloud (GCP), Snowflake, Spark , MATLAB, Minitab, SAP, Qlik Cloud.

Languages: Spanish (C2), English (C2).
